

Which Church (2008)
terra cotta, 22" H x 8" W x 9" D

The church and the witch are joined together in much the same way the yin yang's light and dark portions join to compose a complete circle. The known and the unknown; male and female; front yard and back yard; the predictable and the unpredictable; the civilized and the primitive; the conscious and the unconscious: each of these pairs join together to form a whole and inform and shape the other.

Front cover sculpture is *Pope Joan Revisioned* (2004)
